SUSTAINABLE GROWTH is essential for a healthy and prosperous community. Lance Collins believes in a reasonable plan of growth that: (1) concentrates on developing areas already planned or zoned for growth; (2) requires affordable housing for our community members; (3) promotes diversified and specialized agriculture; (4) develops areas where adequate roads and other support facilities exist; (5) encourages more open areas be set aside for public use and our children's generation; and (6) prevents the erosion of our quality tourism industry from over-building and crowding.

Maui has a WATER CRISIS. Lance Collins proposes to: (1) ensure water is distributed fairly and appropriately, with first priority going to the needs of our local families; (2) help the community negotiate a water use plan that has widespread support; (3) support programs designed to help reduce water waste; and (4) foster a county water policy that ensures the community's long-term economic welfare.

The County Council's role is to BUILD COMMUNITIES. Lance believes councilmembers must: (1) eliminate government practices that divide our community; (2) protect Hawaiian culture and cultural resources as the bedrock of our community; (3) honor the traditions and wisdom of all ethnic and cultural communities; (4) cultivate communication and trust among all stakeholders in county matters; (5) promote democratic policy making by constantly involving community members in decisions; and (6) develop programs and facilities that ensure a high quality of life for our seniors.
